

PRESS RELEASE (November 12th, 2007)

Regional Statistical Profiles for Future Schooling Needs

Spatial Vision has been commissioned to produce a number of Regional Statistical Profiles by the Department of Education and Early Childhood Development (DEECD). These Profiles will assist regions and schools to undertake planning for the Department's Building Futures program. The historic and forecast demographic and socio-economic data and associated analysis delivered through project reports will assist schools and DEECD regions in understanding their broader environment; the characteristics of their local community and expected changes over the coming decades.

Spatial Vision has been contracted to produce Profiles for three of the nine DEECD Regions across Victoria. Each report involves analysing and presenting a range of demographic and socio economic data drawn from the ABS Census of 1996, 2001 and 2006 for local government areas. The Profiles also include the latest State Government population forecasts.

The information will help shape regional educational goals and strategies. In addition, the broader contextual information provided in each Profile, including transport routes and infrastructure, will assist with planning and assessment of different options, particularly where multiple school sites are involved.

The Spatial Vision team was led by Glenn Cockerton and includes Lucy Minato, Cristhiane Da Silva Ramos and Peter MacKenzie.

Who is Spatial Vision?

Spatial Vision works at the leading edge of geospatial and information technology. We develop innovative solutions that integrate geographic information with business applications. We offer unparalleled expertise in the delivery of web-based systems. We produce high quality mapping; supply, manage or audit a wide range of spatial information and undertake sophisticated spatial analysis. We supply and customise GIS applications and provide strategic, actionable consulting advice.

Established in early 1999, Spatial Vision has grown into one of Australia's leading Spatial Information (SI) companies with significant experience in delivering tailored solutions for organisations throughout Australia.

Our Business Partners

In 2002 Spatial Vision was awarded the ESRI New Business Partner of the Year Award.
