

PRESS RELEASE (January 11th, 2006)

Pt_Nepean_PR.doc

Point Nepean National Park and Point Nepean Quarantine Station Management Plan

Parks Victoria and the Point Nepean Community Trust are responsible for the development of a new Management Plan for Point Nepean. This is a very significant development, not the least because it is the first time the Commonwealth and State Governments have worked collaboratively to develop an integrated and long term vision and strategies across two land tenures.

Parks Victoria recently appointed Spatial Vision to undertake a series of 'Have Your Say' brochures and display maps to actively encourage community participation and involvement from interested individuals and groups in the preparation of the Draft and Final Management Plans.

The Draft Plan has posed many challenges for the planners and for Spatial Vision in preparing a range of detailed map products. The Planning Area is unique in that it comprises a mix of highly modified environments such as the Quarantine Station - former Defence land, and the natural settings of the existing Point Nepean National Park.

Under this arrangement, Spatial Vision is responsible for producing:

- A Regional Locality Plan
- Area maps detailing access, visitor facilities, existing buildings within the Quarantine Station, proposed zoning and a proposed setting plan.

The Project will involve providing a Draft set of Plan and Display maps over a three month period to allow for community input and stakeholder consultation. Interim Display maps may be required to keep the public informed.

Final Plan maps will incorporate the outcomes of the consultation process.

Who is Spatial Vision?

Spatial Vision works at the leading edge of geospatial and information technology. We develop innovative solutions that integrate geographic information with business applications. We offer unparalleled expertise in the delivery of web-based systems. We produce high quality mapping; supply, manage or audit a wide range of spatial information and undertake sophisticated spatial analysis. We supply and customise GIS applications and provide strategic, actionable consulting advice.

Established in early 1999, Spatial Vision has grown into one of Australia's leading Spatial Information (SI) companies with significant experience in delivering tailored solutions for organisations throughout Australia.

Our Business Partners

In 2002 Spatial Vision was awarded the ESRI New Business Partner of the Year Award.

Quality Certification
