Planning For Ballarat Schools.doc

Planning for Ballarat Schools

The Department of Education and Training has appointed Spatial Vision to review the future demand for government primary and secondary schools in the greater Ballarat region. This project involves assessing demographic and housing development trends, forecasting the number of school aged children and likely government school selection rates for the next 15 years. Spatial Vision will also review enrolment patterns and use this information to develop long term enrolment estimates for the 50 plus individual schools covered by the study.

Spatial Vision's findings will be used to assess the need for additional school infrastructure within the Ballarat region over the next 10 to 15 years.

Who is Spatial Vision?

Spatial Vision works at the leading edge of geospatial and information technology. We develop innovative solutions that integrate geographic information with business applications. We offer unparalleled expertise in the delivery of web-based systems. We produce high quality mapping; supply, manage or audit a wide range of spatial information and undertake sophisticated spatial analysis. We supply and customise GIS applications and provide strategic, actionable consulting advice.

Established in early 1999, Spatial Vision has grown into one of Australia's leading Spatial Information (SI) companies with significant experience in delivering tailored solutions for organisations throughout Australia.

Our Business Partners

In 2002 Spatial Vision was awarded the ESRI New Business Partner of the Year Award.
