

PRESS RELEASE (August 24th, 2007)

South-East Map Book Released

The fifth (and final) volume of the five book Vicmap Book (covering south-east Victoria) in Spatial Vision's award winning series of topographic map books has been released.

The release of the south-east Vicmap book completes the first edition and delivers up to date statewide topographic mapping at 1:100:000 in hard copy book form for the first time.

Offering 1:100,000 scale maps across the region, plus 1:50,000 maps for selected areas and 1:20,000 township maps, the map book has been produced using the latest Victorian Government topographic information (Vicmap).

New additions for the south-east book include CFA regional office locations, Wind Farm and Wind Turbine locations and updated campsite information for parks and reserves.

These books have been adopted by all of Victoria's emergency services as well as being used by a wide variety of state government agencies (including Department of Sustainability and Environment, Department of Primary Industries, Parks Victoria, and many Catchment Management Authorities), utilities and local governments throughout Victoria.

Each book in the regional series will be updated every two years.

These books are available by contacting Spatial Vision at info@spatialvision.com.au or from leading map sellers throughout the State. Digital versions of the books as well as wall maps are also available by contacting Spatial Vision at info@spatialvision.com.au
