

PRESS RELEASE (April 2, 2004)

Winery Maps of Victoria Press Release.doc

Winery Maps of Victoria

Spatial Vision has recently completed the production of a comprehensive series of maps of Victoria's wineries and vineyards. Commissioned by Tourism Victoria, these maps are being used in the "Wine Regions of Victoria" guide.

Spatial Vision's output included a new map of the State's wine regions as well as maps of each of the 13 individual wine regions showing the names and locations of all key wineries and vineyards and an index.

Spatial Vision's role included collating the winery data, designing and producing the maps and providing EPS files to the brochure producers. The project was completed within a very short timeframe of 5 weeks.

Spatial Vision has successfully completed a large range of mapping assignments for Tourism Victoria.

Who is Spatial Vision?

Spatial Vision works at the leading edge of geospatial and information technology. We develop innovative solutions that integrate geographic information with business applications.

Established in early 1999 and based in Melbourne, Spatial Vision has significant experience in the development of land, natural resource, and asset management and applied social and economic research systems for organisations throughout Australia.

In 2002 Spatial Vision was awarded the ESRI New Business Partner of the Year Award.
